

Create a Private AI Knowledge App for Your People

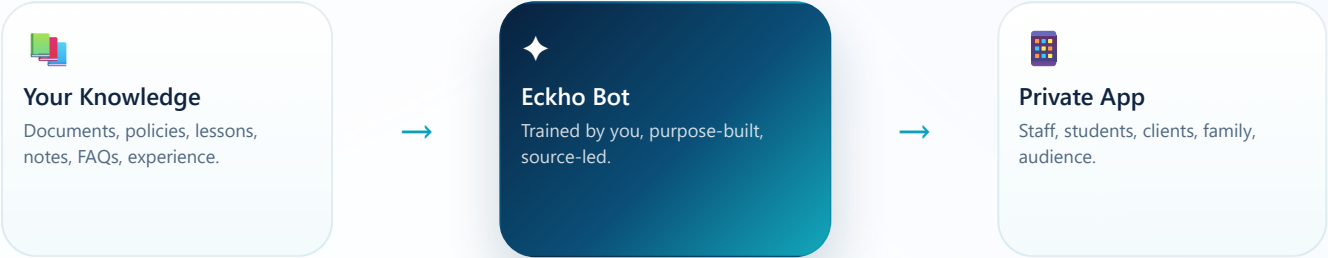

Train Eckho Bots with your own documents, policies, lessons, notes, FAQs, methods, and experience — then share a simple app-like assistant your staff, students, clients, family, or audience can use anytime.

Your knowledge becomes an easy-to-use AI app, trained by you, for the people you choose.

From buried knowledge to a useful private app

What you can create

Teachers & Lecturers
Train it with course notes, lessons, assignments, FAQs, and explanations so students can ask for help anytime.

HR & Onboarding
Give staff fast answers from policies, leave rules, benefits, forms, and onboarding material.

Company Knowledge
Help teams find consistent answers from procedures, product knowledge, and support documents.

Coaches & Consultants
Share your frameworks, methods, templates, advice, and experience in a practical app-like assistant.

Family Knowledge
Preserve advice, stories, lessons, values, and practical knowledge for children, family, or community.

Private, controlled, source-led

- ✓ Your documents stay private
- ✓ Your content stays yours
- ✓ Answers come from the material you provide
- ✓ Share access only with the people you choose

How it works

- 1 Create your Eckho Bot**
Name it and define its purpose.
- 2 Train it with your material**
Upload documents, policies, notes, FAQs, lessons, examples, and experience.
- 3 Share the private app**
Give your people a simple link so they can ask questions anytime.

Always available
Your audience can ask questions 24/7, even when you are unavailable.

Less repetition
Stop answering the same explanations again and again.

Useful knowledge
Turn buried material into answers people can actually use.

Grows over time
Your bot becomes more valuable as you keep training it.
