

YOUR PRIVATE DESKTOP KNOWLEDGE SYSTEM

Your Files. Your AI. Right Here on Your Desktop.

Eckho Desktop turns your existing folders into a knowledge system you can talk to.

Ask questions, get summaries, update logs, and change files directly inside your own folder system.

What is Eckho Desktop?

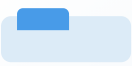

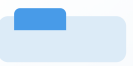

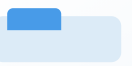

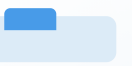

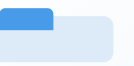

Eckho Desktop is a Windows app that sits on your machine. You point it at your folders. You ask it questions. It finds, explains, and updates your files — without uploading anything to the cloud.

The Four Things It Does

- **Find.**
Surface information across thousands of files in seconds.
- **Explain.**
Get plain-language answers from your documents.
- **Update.**
Add notes, logs, and summaries directly into your files.
- **Change.**
Edit file content on your instruction.

Who It Is For

Built for people who manage large volumes of documents as part of their daily work.

- **Legal & Compliance teams**
- **Property & Estate professionals**
- **HR & People Operations**
- **Finance & Accounting**
- **Operations & Project Management**

Why It Is Different

Your work stays where it belongs: on your own computer, inside the folders you already use.

- **100% local**
Nothing leaves your machine.
- **Works with your existing folders**
No migration needed.
- **No IT setup**
Install it and point it at a folder.
- **Privacy by design**
No cloud uploads.
- **Your files stay yours**
Controlled on your own device.

Ask in plain language

- “Find the latest contract for Client ABC.”
- “Explain what changed in this folder.”
- “Add today’s meeting note to the project log.”
- “Update the status in the tracker.”

Ask your reseller for an industry-specific demo.

See how Eckho Desktop can work with the folders and documents your business already uses.

Find. Explain. Update. Change.
